## Autopilot System: Supported Platforms Version 11.1

This support note lists platforms that are supported by the Trimble® Autopilot™ automated steering system.

**Note:** Use only official Trimble platform kits with the Autopilot system. Always download the latest version of the Installation Instructions from <http://agpartners.trimble.com>. Follow the instructions closely.

### Approved platforms

The Autopilot system can be installed on any of the following Trimble approved vehicles:

- 2WD and MFD (mechanical front wheel drive) tractors
- Tracked tractors
- Articulated tractors
- Combines
- Harvesters
- Swathers
- Sprayers
- Floaters

### Roof brackets

Trimble recommends the roof brackets listed in the tables below as the best mounting option. Often, the roof of the cab does not have bolts for spar mounting, so a magnetic mounting option is provided. Some Autopilot Automated Steering System Installation Instructions describe an alternative roof mounting kit, and how to produce bolt-in brackets.

In addition to spars and magnetic mounting, Trimble offers V-plate indexing brackets for quick removal and repeatable antenna placement. For detailed descriptions of the receiver mounting options and requirements, refer to the Antenna/Receiver Installation chapter in the Installation Instructions. The VHB plate, P/N 62034, is included in the kits for the Trimble® TMX-2050™ display, the Trimble FmX® integrated display, and the Trimble CFX-750™ display.

### Hose kits

For hose kit information, refer to the Installation Instructions.
