

EZ-Pilot Steering System: Supported Vehicle Platforms

This Support Note lists vehicles that are supported by the Trimble® EZ-Pilot® steering system.

The EZ-Pilot steering system can be installed on any of the following Trimble approved agricultural vehicles. More vehicles are approved continually: For the latest list, go to www.trimble.com/agriculture.

Note: Use only official Trimble manufactured platform kits with the EZ-Pilot steering system. Many of the Trimble platform kits include vehicle-specific adapters, spacers, and shims that are essential to prevent steering column damage and degraded performance.

Always follow the installation instructions provided with the platform kit for your vehicle.

Caution: Do not attempt to manufacture or modify brackets for the EZ-Pilot steering system. If you do not use official Trimble platform kits, or if you modify a Trimble platform kit:

- The warranty will be void.
- Steering columns may be damaged, especially on vehicles with plastic steering column shrouds.
- Safety problems could result if the brackets interfere with controls.
- Performance could be affected if there is any flex or movement.
